

Oct. 16/24

- Went over CMS Project Charter + Schedule as a group.
- Assigned upcoming tasks using suggested A/B/C distribution, since we don't yet know what each task entails, and how our task will compare to another.
- Resolved GitHub repository branching issue.
- Reviewed Windows Audio code provided in the course shell.
- Need to:
 - Understand the parameter section in main.
 - ↳ these are from Windows Sound API.
 - write simple menu to select functions.
- Decided that Nigel's version of the Queues Code is more elegant than Fergus' so we will use that version in the main repository.
- Diagnostics Document?
- Linux stuff - get ready at least.

Oct. 17/24

- Commented Code
- Menu Layout Finished
- Resolved Technical Difficulties

Wednesday October 16, 2024

- Read all documentation for CMS (proj. II)
- Updated schedule (Excel) for CMS
- Fergus constructed Status Report
- Nigel made repository on Git

Thursday October 17, 2024

- Reviewed code with teammates
- Tested code and recorded audio
- Made a branch "mushroom0" (deleted) from the main code
- Issue: code only worked on Visual Studio, not V.S. Code
- Created Menu txt file
